

## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Sherry Leonard et al.

Serial No.: 10/723,940 Group No.: 1649
Filed: 11/26/2003 Standley, S.H.
Entitled: Promoter Variants of the Alpha-7 Nicotinic Acetylcholine Receptor

# INFORMATION DISCLOSURE STATEMENT

MS Amendment

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

### CERTIFICATE OF MAILING UNDER 37 C.F.R. § 1.8(a)(1)(i)(A)

I hereby certify that this correspondence (along with any referred to as being attached or enclosed) is, on the date shown below, being deposited with the U.S. Postal Service with sufficient postage as first class mail in an envelope addressed to: Commissioner for Patents, P.O. Box 1459, Alexandria, V.A. 233-13-1450.

Dated: March 7, 2006

Christine A. Lekutis

Dear Sir:

The citations listed below, may be material to the examination of the above-identified application, and are therefore submitted in compliance with the duty of disclosure defined in 37 C.F.R. § 1.56 and § 1.97. The Examiner is requested to make these citations of official record in this application.

Copies of the references listed as 1-14 on the enclosed PTO-1449 are **not** provided as Applicants are no longer required to provide copies of U.S. patents and published applications. In addition, copies of the citations listed as references 15-189 and 192-208 on the enclosed PTO-1449 are **not** provided since they were previously submitted to the Office in the earlier U.S. Application No. 08/956,518, filed on October 23, 1997 (Our File No. VARD-03042), to which priority is claimed. In particular, the citations listed as references 15-189 and 192-208 on the attached PTO-1449 were supplied to the Office in an Information Disclosure Statement (IDS) dated April 2, 1999 (and again in an IDS dated May 13, 2002).

The following printed publications are referred to in the body of the specification:

U.S. Patent No. 4,650,764 to Temin et al. (1987);

- U.S. Patent No. 4,683,195 to Mullis (1987);
- U.S. Patent No. 4,683,202 to Mullis (1987);
- U.S. Patent No. 4,861,719 to Miller (1989);
- U.S. Patent No. 4,946,778 to Ladner et al. (1990);
- U.S. Patent No. 4,965,188 to Mullis (1990);
- U.S. Patent No. 4,980,289 to Temin et al. (1990);
- U.S. Patent No. 5,124,263 to Temin et al. (1992);
- U.S. Patent No. 5,322,770 to Gelfand (1994);
- U.S. Patent No. 5,399,346 to Anderson et al. (1995);
- U.S. Patent No. 5,459,127 to Felgner et al. (1995);
- U.S. Patent No. 5,580,859 to Felgner et al. (1996)
- U.S. Patent No. 5,589,466 to Felgner et al. (1996);
- European Patent No. EP 0178220 (1986):
